

«Julebrev»

from Leka

2021

From December 19th the whole family is gathered on Leka. At the beginning of December it was a short winter on Leka with freezing temperatures. This week there has been wind, rain and a milder temperature. Before Christmas, snow and winter should come again.

After the introduction of an EU vaccination certificate, 2021 was normal and fun for us to be a tourist hosts again. There were no cases of Covid-19 on Leka until December. Now only a few unvaccinated younger people have mild symptoms, so we're lucky.

Despite fishing guests only from the beginning of July, there have been many good catches of fish this year - big halibuts and a lot of pollacks all year.

We did a lot of work on the campsite with more free time than usual. New levels and new parking spaces made, sand pumped, woodcutting, stonecutting, etc.

Anne Britt and Jostein were travelling by car from Leka to Munich and back at the end of October / beginning of November to visit the mineral fair in Munich. We were in Barfußgasse in Leipzig to eat and enjoy beer. We also went to Heidi and Gerold's new house in Taucha. Two days shopping in Kiel on the way back - mulled wine and spices have become a tradition at Leka.

At the end of November we were in Budapest for a few days. After Christmas we will go to Trondheim for a few days. Our daughter Oda has moved and needs help setting up the new apartment. Otherwise we will continue to work on our camping site in the winter. The first boat will be launched at the beginning of April. We are happy!

Merry Christmas and a Happy New Year

Oda, Are, Anne Britt and Jostein
